**NOTE:** A referral to Integrated Vascular Management Clinic (IVMC) will result in a comprehensive vascular history, risk factor profile and system wide workup being performed. A vascular physician will be assigned to each patient referred. Additional specialty referrals will arise from IVMC as the patients investigation process. The family physician/Nurse Practitioner will be kept fully informed of the investigations and the management plans.

Eligible patients for TIA clinic are those thought to have had a recent transient ischemic attack. The Clinic will coordinate investigation and consultation scheduling with the aim of having all investigations completed, reported and ready for vascular physician within 72–96 hours of the referral. **NOTE: Dizziness with no other features is not likely to represent TIA and should not ordinarily be referred to this clinic.**
